

Caddihoe 2025 – Demo Entries

I have created dummy entries and results to test/demonstrate the following:

Start Time Allocation

I have not been able to find a canonical source for what the exact correct settings should be, so I have simply used the same settings that Alison used last year:

- Everyone: separated by 2 minutes
Fall back to 1 minute if it gets too crowded
- Colour courses: separated by 4 minutes
- Families: (based on surname) separated by 5 minutes
- Friends: (based on a shared Racesignup entry) separated by 4 minutes
I have simulated this by saying every 10 dummy entries are on the same RSU entry e.g. 1-10 are together, 11-20, etc.
- Shared first legs: these courses never have simultaneous start times
This means I cannot allocate start times until I have received the final course files
- Elites (M21/W21): no special rules for M21/W21
(I remember Phil separating M21/W21 by 4 minutes in the past, if desired?)
- Clubs: no special rules
- Seeding: no special rules
- Age classes: no special rules

Given the high volume of dummy entries, I set a 12 hour start window, but you get the idea!

Set up so that punching time overrides allocated time.

Eligibility

Remember that I am not in control of UKOL; this is all handled when we send the results off.

Caddihoe Eligible = “C”

SW Middles Eligible = “S”

- The Male classes demonstrate:
 - Running down = ineligible
 - Running up = eligible
(Examples of doing this for both days – thus being Caddihoe eligible – are rare but there are a few on select courses)
 - Absence either day = ineligible
 - Mismatched courses = ineligible (e.g. run up one day, run ‘exact’ the other day)
 - SW Middles eligibility only cares what happens on Sunday
- The M55 class further demonstrates:
 - Not a BOF/SWOA member = ineligible for SW Middles
 - Running as non-competitive
 - Either day = ineligible for Caddihoe
 - Sunday = ineligible for SW Middles

I also needed to make sure what I've done can cope with combinations of the above, which is why there are so many dummy entries.

Start Lists

Two formats that I believe fit your specifications:

- Sorted by Start Time then Course
- Sorted by Name

I will sort this out for Day 2 as well, just had a slight hiccup

Results

Various results formats

- The usual split times for geeking
- Combined Caddihoe results
- Eligibility markers and filters
